MO HEALTHNET EMPLOYER MATCH REPORT

Executive Summary

The MO HealthNet (MHN) Employer Match Report provides a description of employers that employ 50 or more MHN participants or those responsible for MHN participants. MHN is Missouri's Medicaid program. This report, prepared by the Department of Social Services (DSS) from available data, does not purport to be a full accounting of Missouri employers with MHN participants. The report is intended to provide the reader with the relative incidence of MHN participation among larger Missouri employers. The report methodology and data limitations are discussed at the end of this report.

MHN participants were identified from the MHN eligibility file provided to DSS workers by MHN adult and child participants. Total employment figures were obtained from an InfoUSA database provided by the Missouri Department of Economic Development. Based on Missouri employers listed by InfoUSA as having 150 or more employees, DSS identified approximately 2,300 employers. Of this number, 172 employers had 50 or more employees who either received MHN benefits or was responsible for a family member (spouse or child) who was a MHN participant.

Summary Statistics for Statewide Data:

Participation Counts

MHN Enrolled Employees (E)	11,009
Employees with MHN Enrolled Family Members	19,798
Total Employees (E+N)	30,807
MHN Enrolled Spouses (S)	2,062
MHN Enrolled Children (C)	43,934
Total MHN Enrollees (E+S+C)	57,005
Percent of Workforce Receiving MHN Benefits	6.7%

Participant Costs

HIPP Enrollees	171
HIPP Payments	\$31,071
Title XIX Cost	\$26,332,337
Title XXI Cost	\$401,581
Other Cost	\$2,382
Total Cost	\$26,767,371
Per Capita/PMPM Cost	\$157

MO HEALTHNET EMPLOYER MATCH REPORT

Methodology

Based on the data included in the Department of Social Services (Department or DSS) MO HealthNet (MHN) electronic eligibility file, the DSS attempted to determine the number of employees and their dependents who received MO HealthNet benefits for employers of 150 or more employees in the State of Missouri. The time period examined was January to March, 2009.

DSS examined all Missouri employers that were listed by InfoUSA as having 150 or more employees. Using the InfoUSA database, DSS identified approximately 2,300 such employers. Of this number, 172 employers had 50 or more employees who either received MHN benefits or was responsible for a family member (spouse or child) who was a MHN participant.

InfoUSA is a commercial enterprise that compiles business and personal data for sale to businesses. According to its website, InfoUSA maintains a comprehensive database of 210 million consumers and 14 million businesses. To compile their databases, InfoUSA starts with more than 4,000 telephone directories and 350 new business sources, such as Secretaries of State, county courthouses and public record notices. To verify and update the information in the database, two hundred "teleresearchers" make 22 million calls to businesses each year. The Department of Economic Development subscribes to this service and shared the data with DSS.

The InfoUSA database includes the name and address of the employer, the number of individuals employed by the company, and the NAICS industry sector code of the employer. Though this is the best public database available from which to validate employer names and access total workforce by employer, there are drawbacks in data integrity that should be noted, including:

- Duplicate Listings
- Name Discrepancies (EFOC Corp. listed for Pella Window, etc.)
- Database Age
- Incomplete Total Workforce Numbers
- Inconsistency in Franchise Employers

Department staff have taken action to de-duplicate entries and transpose common names for legal names where such steps were substantially certain to improve the quality of the report.

The Department obtained information on MHN participants in the Family Support Division (FSD) electronic eligibility file, known as the FAMIS database, for the period of January to March, 2009. Currently, MHN aged or disabled participant eligibility resides in a legacy database that does not contain adequate employer data to be included in this report.

Based on employment information in the FAMIS database, each MHN family member was assigned a code:

E = an employed individual who is a MHN participant;

N = an employed individual who does not participate in MHN but is responsible for a spouse or child who does;

C = an MHN enrolled child of an employed individual; or

S = an MHN enrolled spouse of an employed individual.

Because there is no protocol for employer name entry, thorough manual analysis was required to account for the different ways employer names are shown in the FAMIS system. This analysis resulted in standardizing employer names due to the inconsistency in spellings and collapsing multiple level organizations to specific parent company. Due to the incompatible information between the InfoUSA database and the FAMIS eligibility database, employers of franchise organizations were not collapsed into one organization.

Timing of data should be considered when reviewing this data match. Enrollees are required to notify the DSS when they have any change in status, such as a change in employer or a change in pay. However, these changes may not always be reported in a timely fashion. If status changes are not reported to DSS by the MHN participant, DSS may be unaware of the change until the next annual reinvestigation when the information in the database will be updated.

The cost of MHN benefits was calculated by MHN's claims processing contractor, Info Crossing (IFOX). The contractor used the DSS file to match MHN participants with paid claims during the reported quarter and assigned the cost to the appropriate employer. If an MHN participant was associated with more than one employer, the cost for that individual was apportioned equally to each employer. If an individual had two employers, the MHN cost for that individual was divided equally between the two. If there were three or more employers, the cost was allocated among the employers in a similar fashion.

As well as showing the total cost for each employer, costs were divided into Title XIX claims, Title XXI claims, and HIPP premium payments. HIPP premium payments are made when a MHN enrollee has access to employer sponsored health insurance and it is more cost effective to pay the healthcare premium for the individual than to provide traditional MHN coverage. In such cases, the private insurance becomes the primary carrier and MHN is the secondary carrier paying only for those services not covered by the primary carrier.

The Department computes the monthly per capita cost. The per capita cost is expressed in Tables 6 and 7 as a "per member, per month" (PMPM) cost. The PMPM cost is determined by dividing the total cost (Title XIX, Title XXI, Other, and HIPP) by the number of MHN enrollees (E+S+C). The quarterly cost is then divided by three months in order to obtain the monthly cost.

The electronic eligibility file used by DSS to compile this report does not contain specific employment dates or employment history. Therefore, there is not a direct correlation between paid claims data and employment data. The DSS data used for this report contains the most recent employer or employers, while claims data was counted for the entire quarter. This means that the costs of all claims incurred during the quarter were attributed to the most currently reported employer on file. It is possible some claims may have been incurred by an individual during a period of unemployment or while working for a different employer. The reader of the preceding tables should not rely on this data as a complete account of Missouri employers that have MO HealthNet enrollees or have employees responsible for MO HealthNet enrollees. It is, however, a reasonable depiction of the overall state of MO HealthNet benefit usage at employers with 150 or more employees and 50 or more total enrollees affiliated with that employer.
